PYTHON DEVELOPER

Job Title:- Python Developer
Location:-
Employment Type:- Full Time
Department:- Development
Salary Range:- INR 30,000 - 100,000 /

Job Description:-
We are looking for a skilled **Python Developer** with **2+ years of experience** to join our team. The ideal candidate should have hands-on experience in **backend development, API integration, and data processing**. You will work on designing, implementing, and optimizing scalable applications while collaborating with cross-functional teams.

Skill & Qualification:-
Must Have:

- 2+ years of hands-on experience in Python backend development.
- Strong understanding of MongoDB, and Redis.
- Experience with REST API development and WebSockets.
- Hands-on experience with Celery, RabbitMQ, or Kafka for task management.
- Basic understanding of asynchronous programming and multi-threading.
- Proficiency in Ubuntu/Linux for server deployment and management.
- Strong problem-solving and debugging skills.
- Good communication and ability to work in a fast-paced environment.

Preferred:

- Experience with Docker and Kubernetes for containerized deployments.
- Familiarity with CI/CD pipelines (GitHub Actions, Jenkins, GitLab CI/CD).
- Knowledge of streaming frameworks (Kafka, Spark Streaming, Redis Streams).
- Basic understanding of cloud platforms (AWS, GCP, Azure).

Job Roles & Responsibilities:-

- Develop and maintain backend applications using Python.
- Design and optimize RESTful APIs for high-performance applications.
- Work with MongoDB Redis to manage the database efficiently.
- Implement asynchronous task scheduling using Celery.
- Develop real-time streaming applications using WebSockets.
- Manage data collection, processing, and storage workflows.
- Deploy and optimize applications on Ubuntu-based servers.
- Collaborate with front-end developers, DevOps, and data engineers.
- Troubleshoot and optimize query performance and API response times.
